DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The following limitations represent new matter in the application:

1. The inner wheel being pivotal with the link about the inner axis through a plurality of angular positions (lines 10-11 of claim 1).
2. The connecting means for holding the outer wheel in the same angular position relative to the inner wheel regardless of the angular position of the main link (lines 15-17 of claim 1).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3636

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1, as best understood with the above cited indefiniteness, is rejected under 35 U.S.C. 102(b) as being anticipated by Ryan et al (4678229). Note the frame (33), main link (55), main link inner axis (through 25), main link outer end (at 57), main link outer axis (through 57), outer arm (7), outer arm inner end (at 57), outer arm outer end (at 60), foot rest (9), inner wheel (56), outer wheel (34), connecting means (25), and drive means (41, 37).

Response to Amendment/Arguments

Applicant's response filed November 30, 2004 has been fully considered.

Remaining issues are outlined above.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 3636

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Claims 2-12 have not been rejected in view of the prior art of record, however note the rejections under 35 U.S.C. 112, first paragraph.
